 Unlike
 Verified Mobile Numbers

E. UNKNOWN OTHER DATA CATEGORIES

There might be more data categories we don't know about so far. We got an internal list of additional categories which Facebook likely holds about every user.

INFORMATION:

This lists contains data categories from (1) the data set we got, from (2) the first report by the Irish DPC and from a (3) list of our complaint number 10, which was confirmed to be correct by Facebook during our meeting in Vienna.
